

Labr-Trak

➔ Achieve world-class manufacturing execution and improve labor productivity with Infor ERP SyteLine Labr-Trak.

Do business better.

Top manufacturers have a new secret weapon—Manufacturing Execution Systems (MES), because true quality management demands quality execution. These manufacturers know that old-fashioned punch clocks and paper-based schedules simply can't keep a modern manufacturing workforce operating at peak efficiency. But improving efficiency is only the first step—you need full interoperability with all business applications to ensure that all departments work with the same goals in mind at all times.

Leverage experience.

Infor delivers decades of expertise at manufacturing execution and embodies that expertise in software built to make your entire enterprise more productive every day. Infor™ ERP SyteLine Labr-Trak connects the comprehensive power of SyteLine by adding the first of a full suite of manufacturing execution systems to deliver better results to every corner of your business.

Get business specific.

Infor ERP SyteLine Labr-Trak automates the full range of shop floor workforce administration and delivers accurate job costing and payroll data with no manual intervention through a rich feature set that includes:

Simultaneous multiple machine management—Keep an accurate accounting of payroll and job costing with Labr-Trak while starting or ending any number of machines at any time.

Multi-Job—Labr-Trak's Multi-job module allows an employee to process multiple jobs on a single machine simultaneously or in rapid succession. Sophisticated, instantaneous calculations allocate the actual time to each job for perfect precision and optimal productivity.

Team and crew support—Infor ERP SyteLine Labr-Trak supports work center teams or crews, allowing one person to reassign an entire team from one job to another. You can add or delete team members at any time.

Visual Dispatch—The graphical display of this module shows workers real-time dispatch information for any work center or machine, in a format resembling the traditional magnetic scheduling board, making it readily acceptable and easy for employees to read and follow.

Insightful, real-time reporting—Infor ERP SyteLine Labr-Trak reporting gives managers real-time employee status information and shop floor status without leaving their desk.

Additional Features

- Time and attendance data that flows directly from Infor ERP SyteLine Labr-Trak into Infor ERP SyteLine Payroll or ADP
- Reconciliation of time and attendance, with shop floor labor
- Touch screen data entry option eliminates any need to touch a keyboard
- Bar-code printing and data collection device support for speed and accuracy
- Support for your current plant entry security devices
- Support for manufacturing material issues as well as labor
- Support for modern, Lean manufacturing practices, with support for Kanban Replenishment, Just-in-Time Manufactured Items, WIP Transactions, and Rules-based User Defined Labels.

Infor ERP SyteLine Labr-Trak improves quality at every step of your manufacturing process. By adding our specialized shop-floor document management system, Infor ERP SyteLine Doc-Trak, you'll ensure that your workers have the latest, most accurate documentation for every task. Infor Product Lifecycle Management (PLM) also connects with SyteLine to

help you create a habit of continuously improving your products and delighting your customers.

See results now.

Manufacturers gain unique and powerful advantages from Infor's advanced application architecture. Our suite of fully interoperable applications, including Performance Management, Financial Management, Supply Chain Management, and others, combine to unify all the complex aspects of a modern manufacturing operation. Our support of open standards such as OAGIS seamlessly connects you to non-Infor applications and gives you a path to non-disruptive upgrades to keep you at top performance permanently. More timely and accurate information gives you a more productive workforce, more satisfied customers, and a more profitable organization.

About Infor.

Infor acquires and develops functionally rich software backed by thousands of domain experts and then makes it better through continuous innovation, faster implementation options, global enablement, and flexible buying options. In a few short years, Infor has become the third largest provider of business software. For additional information, visit www.infor.com.
