

# SyteLine Shipping & Logistics

➔ Infor ERP SyteLine Shipping & Logistics helps accelerate and simplify the picking, packing, and shipping processes for engineer-to-order, configure-to-order, and highly repetitive manufacturing companies.

## Do business better.

For discrete manufacturers, today's demanding business environment leaves no room for errors or inefficiencies. You need to manufacture high-quality products with tight inventory management and super efficient production. But the need for excellence doesn't stop once finished goods arrive at your loading dock. On the contrary, shipping finished products to customers on time, at the lowest possible cost can contribute as much to your overall success as producing the right product at the right cost. As a result, many discrete manufacturers are seeking ways to streamline their supply and logistics processes to reduce costs and improve customer service levels.

## Leverage experience.

To help discrete manufacturers meet the need for excellence in shipping and logistics, Infor™ has developed Infor ERP SyteLine Shipping & Logistics. The solution provides enhanced shipping, warehouse, and logistics capabilities for companies using the Infor ERP SyteLine solution. Infor ERP SyteLine Shipping & Logistics helps accelerate and simplify the picking, packing, and shipping processes for engineer-to-order, configure-to-order, and highly repetitive manufacturing companies.

## Get business specific.

Infor ERP SyteLine Shipping & Logistics features a modular design for easy installation without modifying your Infor ERP SyteLine solution. Users get powerful new shipping tabs in key Infor ERP SyteLine screens to better manage

shipping processes. Your customers get more flexibility in tracking their shipments and your company benefits from advanced capabilities for shipping the goods you manufacture. The solution can improve your business performance in numerous ways, including:

**Improve visibility.** Infor ERP SyteLine Shipping & Logistics includes a visual workbench that helps users quickly view shipments by due date, priority, type of shipment, customer groups, or user-defined group.

**Automate shipping processes.** The solution makes it possible to reduce numerous manual steps by automating core shipping-related tasks and reducing associated paperwork.

**Give employees more flexibility.** With Infor ERP SyteLine Shipping & Logistics, users can access the solution using a web browser. They can view shipping schedules in real-time and easily verify orders to ship. As needed, they can print labels and paperwork, including a bill of lading and export paperwork. Freight costs and tracking numbers are instantly captured and email notifications are sent automatically. Employees also can leverage wireless/radio frequency (RF) technology to manage real-time warehouse and barcode scanning.

**Deliver new services to customers.** The solution makes it possible to respond to customer requirements for special labeling, paperwork, and other services. In addition, customers get the ability to track their shipments via a web browser.

**Scale the solution to fit your needs.** Infor ERP SyteLine Shipping & Logistics is available in flexible and scalable packages that fit your business. These include:

- *Standard Shipping.* Provides workbenches for pick-pack-ship, UPS/FedEx integration, less than truckload (LTL)/truckload planning and paperwork, documents, inventory staging, auto shipping, and web portal and web reports.
- *Advanced Shipping.* Provides additional functionality for carrier selection, contents packing, export shipping and paperwork, lot/serial tracking, LTL contracts and rating, freight

quotes, load/route planning, transfer order shipping, and miscellaneous shipping.

- *Shipping, warehouse, and mobile.* A complete shipping, warehouse, and mobile solution with additional capabilities for using wireless/radio frequency (RF) barcode scanning, inventory allocation, capable to ship services, and kitting.

## See results now.

Infor ERP SyteLine Shipping & Logistics can enhance your business performance and results in many ways, including:

- Reduce errors
- Reduce costs
- Deliver new, enhanced services
- Improve customer service
- on-time delivery results
