

Labr-Trak

*"We were at the point of upgrading our hardware and looking for a system that would automate our payroll and costing. With Labr-Trak, we were able to address these issues and have experienced tremendous success in both time and cost savings."*

– Tim Sullivan  
Unison Engine Components

## **Unison Engine Components Significantly Reduced Costs and Increased Productivity Using Labr-Trak**

Unison Engine Components in Terre Haute, Ind., is a single-location operation that manufactures turbine engine parts for civilian and military aircraft. Originally owned by Smiths Group, the company was purchased by General Electric in 2007 and employs approximately 360 people.

## Manufacturer's Challenge

Unison Engine Components recognized that its payroll and costing processes were much too labor intensive. With a vision of streamlining operations, the company sought a solution that would automate collection and vouchering of shop-floor labor information and integrate payroll and costing data with its SyteLine system. The ultimate goal? A 360-degree view of the entire organization.

After comparing several labor-tracking software solutions, management selected Labr-Trak to automate processes and eliminate numerous time-consuming, manual activities.

## Unison Engine Components' Labr-Trak Solution

Labr-Trak made a dramatic impact on the company's labor collection and vouchering processes:

**Reduced data entry time** to complete the payroll process from 120 hours to two hours per week.

**Increased accuracy** of labor collection.

**Enabled the labor approval process** to be handled electronically.

**Gained employee acceptance** since Labr-Trak is so easy to use.

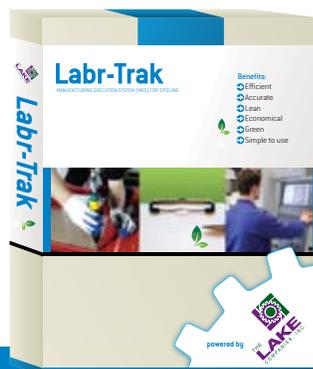

**Achieved consistency in employee use, rules and standards** for collecting and reporting labor.

**Integrated payroll and costing data** with its SyteLine system.

**Improved decision-making** by presenting a holistic view of company information.

**Permitted employees to focus on value-added activities** instead of manual tasks.

# Labr-Trak

## Your Entire Organization Will Become More Productive With Labr-Trak

When you choose a Labr-Trak solution, you'll streamline operations and increase efficiency by reducing time-consuming manual tasks — and maximize your potential for growth and profitability. And it's so easy to train your employees to use Labr-Trak that you'll be able to quickly implement your enterprise solution and enjoy its many benefits.

## Labr-Trak Will Help You Transform Your Company's Future

Having the ability to establish two-way communications between your shop floor and the rest of your organization is invaluable. You'll reduce labor costs, save time with touch-screen access, make better decisions and improve on-time delivery and customer service.

With Labr-Trak, you'll have the ability to achieve these competitive advantages:

- Improve labor productivity
- Streamline manufacturing operations
- Increase data accuracy
- Track jobs more effectively
